## All episodes added!

Posted by shutz - 2007/12/10 21:15

---

Greetings! We have just added all the episodes of One Piece. Now we just have to keep it updated!

We couldn't find titles and summaries for all of them. You you want to write the title of episodes, feel free to do it, either post them here, or comment on the episode. We'll then move the titles or reviews next to the episode and give you credit for this!

If you are a webmaster, this is a great way to bring in some links for your site.

Hiya!

I've been trying to watch the One Piece episodes, but they all say that the vidoes have either been taken down or aren't available in my region.

I'm just wondering if they're just down for awhile or if they aren't available in Texas (Texas is in America btw, last trip I took to France no one had heard of it, and I'm not really sure where everyone is from, this bein the internet and all ;)

HI,  
as we don't host the episodes on our servers, we can't check every episode on the other servers where they are hosted if they are deleted or not. This is why we want to communicate as much as we can with our users.

Could you please tell us which episodes you can't see.  
Our crew is also checking on the episodes, and indeed, it seems that some episodes are missing. We will replace them as soon as possible with new ones. Just please let us know which ones you can't see

The first one i tried was episode 96, that was where the site i had been watching them from stopped offering them for some reason, after that i had just tried 2-3 other random ones from 1-100 and none of them played either, so i figured they were all down, I'm sorry i cant be more specific, but ty for the help and response, this was my first post and i wasn't sure how long it usually takes ^^

indeed, looks like almost all the episodes of one piece are missing. Well, it will take some time until we replace them all, but we will. Will let you know here while we add them

awesome, I'm just glad I wasn't doing something wrong and sounded crazy XD

ty for actually looking into this ^^
